PROFILE

Full Stack Developer proficient in **C#, ASP.NET, .NET Framework, Node.js, React, JavaScript and SQL Server**, focused on building robust web applications, database-driven systems and business solutions.

Technical Skills: C#, ASP.NET, .NET Framework, Node.js, React, JavaScript, SQL Server, Bootstrap, WCF, Git

EXPERIENCE

Comet Info Solutions — Mumbai, India

Software Programmer | June 2024 – Present

- Developed stock market back-office and reporting solutions to automate report generation and improve data accuracy.
- Built interactive dashboards for investment and portfolio performance tracking.
- Optimized SQL queries and stored procedures to improve database performance.
- Developed responsive interfaces using Bootstrap and JavaScript; participated in Agile development and Git-based version control.

PROJECTS

1. InCred Capital – Branch Back Office

Stock broker back-office application for client portfolios, transactions, reports and business workflows.

Enabled users to access transaction details, portfolio information and generate business-related reports efficiently.

Technologies: C#, ASP.NET, SQL Server, JavaScript, Bootstrap

2. Suresh Rathi – Client Back Office

Client back-office application providing client information, transaction details, reports and portfolio operations.

Streamlined client operations by providing centralized access to portfolio data, transaction information and reporting features.

Technologies: C#, ASP.NET, SQL Server, JavaScript, Bootstrap

3. Nine Star – Branch Back Office

Branch back-office application supporting client management, operational activities, reports and financial processes.

Helped branch users manage day-to-day business operations and access client and financial information through a centralized system.

Technologies: C#, ASP.NET, SQL Server, JavaScript, Bootstrap

4. Stock Market Back-Office Report System

Developed a broker back-office application for client portfolios with PDF/Excel reports, transaction history, P&L and tax details. Automated report generation and reduced manual effort by providing accurate and downloadable portfolio and tax reports.

Technologies: ASP.NET (C#), SQL Server, WCF, iTextSharp, Bootstrap, JavaScript

5. Chatbot

Interactive chatbot application with React frontend and .NET WCF backend. Implemented frontend-backend communication to process user interactions and provide responses through an interactive web interface.

Technologies: React, .NET, WCF

EDUCATION

Metropolitan Institute of Technology and Management — Maharashtra, India

B.E. Computer Engineering | 2021 – 2025

AI A.R Kalsekar Polytechnic — Maharashtra, India

Diploma in Computer Engineering | 2016 – 2020
